The prior art of record fails to disclose the combination of a method for manufacturing a semiconductor device recited in the base claims 1, 2, 9 and 10. Specifically, the combination of the process comprising: irradiating the semiconductor layer with a laser beam to crystallize the semiconductor layer wherein the laser beam is a second harmonic component having a wavelength of 532 nm generated from a continuous-oscillate light source, and wherein the irradiation of the semiconductor layer is conducted in such a manner that the semiconductor layer is scanned with the laser beam in parallel with a carrier flow direction in the channel region or from the source region to the drain region (claims 1, 2 and 10); or the combination of the process

comprising: irradiating the semiconductor layer with a linear laser beam to crystallize the semiconductor layer, while moving the substrate in a direction approximately perpendicular to a lengthy direction of the linear laser beam, wherein the linear laser beam is a second harmonic component having a wavelength of 532 nm generated from a continuous-oscillate light source (claim 9).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
